

# THE GREEN HOUSE

at Narara Ecovillage -  
SuperAdobe Workshop  
Sat 8th - Fri 21st Feb 2020

## WELCOME!

We are so excited to be sharing our love of Natural Building through this wonderful project and workshop, which has been in the making for around 3 years.

## WHAT'S HAPPENING?

Hands on experience and sit-down instructional classes will cover:

- Theory on all Natural Building Techs
- Hands on SuperAdobe construction
- Identifying and using wild site clay
- Solar Passive Design Theory
- Making Natural Renders
- Tadelakt intro class
- Earthship Tour and Dinner  
*plus heaps more tips and tricks*

## HOW MUCH?

The cost includes all meals, all learning plus a beautiful camping spot with showers and toilets, to be your home base for the duration of your stay.

**\$500 PER WEEK**  
**\$900 FOR 2 WEEKS**  
**\$100 PER SINGLE DAY**

**EARLYBIRD 10% OFF - TIL 24TH JAN**

## WHATS AN ECOVILLAGE?

Narara Ecovillage is a wonderful blossoming community of like-minded people who wanted to take community seriously in this modern world. The structure of the extensive village is both personal and vast. The blue-print that it can provide to Australia and the world is very promising and interesting. It is definitely a different way to structure villages and neighbourhoods, and should prove an interest to everyone who attends the workshop.

## WHAT TO BRING

Camping gear, van - Clothes to get dirty - Clothes to hang out in - Good hat - Good boots - Sunscreen - Gloves - Stationary and Notebook - Something to share - Something to play/with - A keen spirit and ready body!

## A LITTLE MORE ABOUT US

The house was instigated by Linda, and refined and designed by Will of Integrated Bio-Tecture Design, and will be constructed by many hands, including Kenney, Will's business partner and friend, and Hayden, owner of Curvatecture.

Will sees Integrated Biotecture Design as a way to explore his passions for sustainability through environmentally conscious design in architecture and its interactions with its natural surrounds. He has attained a Ma in Architecture, and is co-hosting the workshop alongside Hayden.

Hayden has taught many workshops over the last 6 years, and studied SuperAdobe and Natural Building at Cal-Earth in California, and has dreams of opening a solar powered recording studio, and a natural building school. Kenney is working alongside Will, and also runs Lucid Space Designs, a company focussing on building large structures and stages, primarily from bamboo, for festivals and events.

They have all come together for this intricate, involved, complex build, and you can be very lucky to be at the beginning of it all!

---

## WE HOPE TO SEE YOU ALL THERE!
